

lucemioSM 
Outsourcing Solutions

lucemio can help you to run leaner operations.

Rework, waste and downtime are all costly, but we can work with you to reduce all of these. We can partner with your engineers to decrease equipment failure, provide you with cycle time analysis, and warranty and root cause analysis. In addition, we can help you to forecast demand and perform 'what-if' analysis so that you can reduce costs, while increasing quality and customer satisfaction!

BPO

Benefits & Process

Key Benefits

Improved Outcomes

Our BPO helps you to easily **resolve blind spots** within your business processes by **increasing visibility** in key business areas.

Competitive Advantage

The ability to **flex your resources up or down** **augments your cost structure** while ensuring you **receive actionable analytics and reports**.

Improved ROI

Our BPO leverages global talent managed from the United States to **assure you quality, compelling economics and improved ROI**.

Core Process

Build

We'll **agree on the frequency and deadlines for the deliverables to be transferred to us** and outline the requirements for each of those deliverables.

Access

We'll work with you to **ensure that we have secure access to the datasets** that we need to be able to perform our manual analysis on your behalf.

Retrieve

Once completed you'll **retrieve your deliverables** from your own system or our secured storage Cloud **and sign-off** on those deliverables.

Help your Manufacturing firm to
outperform with our BPO solutions.
